HOSE SAFETY

SAFE HOSE ASSEMBLIES

Reduce the risk of hose failures through routine hose inspections, testing and certification programs. Our OnGuard™ hose management services include testing, tagging and traceability of your hoses from “cradle to grave”. These proactive programs are managed by our hose experts and keep you running efficiently and safely.

With in-house fabrication, crimping & welding facilities, we offer a variety of reliable hoses for your petroleum and chemical applications such as:

- In-Plant Transfer Hoses
- Tank Truck Transfer Hoses
- Rail Car Loading / Unloading Hose
- Steam Hoses
- Water Hoses
- Gas / Cryogenic & Air Hoses

HOSE TESTING & MANAGEMENT YOUR FIRST LINE OF DEFENSE AGAINST:

- Hose Failures
- Leaks / Spills
- Costly Downtime
- Accidents
- Injuries
- OSHA / EPA FINES

PROVIDING ANSWERS TO YOUR TOUGHEST QUESTIONS

- Are our hoses safe and in compliance?
- Have our hoses been tested?
- Are our employees safe?
- Where is the documentation on our hoses?
- Can I locate our hoses?
- Are our hoses properly installed?
- Are our hoses tagged and well-maintained?
- Is our equipment safe?

SERVICE VALUE

Our on-site services include performing visual inspections for you, hydrostatic proof tests up to 50,000 P.S.I., continuity testing, hose installation, replacement, hose safety audits, employee training, and more – with all results available on an online database 24/7.

1

TEST

We can pressure test hoses up to 50,000 psi., utilizing various in-house hose test procedures & equipment

2

TAG

All hoses are tagged with unique hose ID and customer specific information.

3

TRACK

Cloud-based OnGuard™ Asset Tracker provides full hose asset traceability

ENGINEERED SAFETY SOLUTIONS FOR PRODUCT TRANSFER

- For chemical transfer operations
- Available in carbon steel or stainless, aluminum, in many styles and sizes.
- Swivel Joints
- Specialty Loading Systems
- Top or Bottom Loading Systems

CUSTOM GASKETS

Roll sheet goods, custom gaskets, metallic spiral wound gaskets, sponge products, rubber stripping, joint sealants, anti-vibration pads, matting. EPDM, PTFE/Teflon®, Red Rubber, Silicone, Neoprene, Viton, Non-asbestos.

EXPANSION JOINTS

From 2" to 120" nominal diameter (tube sizes available); from full vacuum to 3000 PSI; stainless steel, nickels, or nonmetallic joints in rubber, PTFE/Teflon or fabric available.

PRODUCT USES

Expansion joints absorb movement, improve thermal stability, reduce mechanical noise and compensate for misalignment. This will improve factory performance, reliability and service life.

DRY DISCONNECTS & BREAKAWAYS

HOW THEY WORK

Dry Disconnects have a mechanism to shut off flow before disconnect to virtually eliminate spillage from hose or pipe. If accidentally disconnected, many auto shut-off. Styles use different mechanisms, materials (316 SS, Hastelloy, Poly, Aluminum, Brass), seals & connection types.

Everything you want to know about your hoses
-- whenever you need it, all day, every day.
