## HOSE SAFETY

# WHY ONGUARD FOR HOSE?

Reduce the risk of hose failures through routine hose inspections, testing and certification programs. Our OnGuard™ hose management services include testing, tagging and traceability of your hoses from “cradle to grave”. These proactive programs are managed by our hose experts and keep you running efficiently and safely.

Our OnGuard™ hose management services includes testing, tagging and traceability of your hoses from “cradle to grave”. These proactive programs help you avoid costly equipment downtime, maintenance costs and reassure you that your hoses are working efficiently and safely. Our hose assembly and testing processes fully comply with Hose Safety Institute guidelines for hose fabrication. Our fabricators and sales personnel are tested and compliant to these standards.

## HOSE TESTING & MANAGEMENT YOUR FIRST LINE OF DEFENSE AGAINST:

- Hose Failures
- Leaks / Spills
- Costly Downtime
- Accidents
- Injuries
- OSHA / EPA FINES

## PROVIDING ANSWERS TO YOUR TOUGHEST QUESTIONS

Are our hoses safe and in compliance?

Have our hoses been tested?

Are our employees safe?

Where is the documentation on our hoses?

Can I locate our hoses?

Are our hoses properly installed?

Are our hoses tagged and well-maintained?

Is our equipment safe?

## SERVICE VALUE

Our on-site services include performing visual inspections for you, hydrostatic proof tests up to 50,000 P.S.I., continuity testing, hose installation, replacement, hose safety audits, employee training, and more – with all results available on an online database 24/7.

1

### TEST

We can pressure test hoses up to 50,000 psi., utilizing various in-house hose test procedures & equipment

2

### TAG

All hoses are tagged with unique hose ID and customer specific information.

3

### TRACK

Cloud-based OnGuard™ Asset Tracker provides full hose asset traceability

## WHY ONGUARD FOR HOSE?

Safety and compliance through our expertise and technology. We bring our hose expertise and hose management services to your door. We are there exactly when you need us and provide peace of mind when you are on your own. Our team is trained and certified to provide on site hose testing service to requalify hoses and provide hose installation support and training. Test reports are also provided upon request and always stored in our OnGuard™ Asset Tracker database. Track all of your assets- industrial hoses, hydraulic hoses, gaskets, conveyor belts, and other products in one database.

Our on-site services include performing visual inspections for you, hydrostatic proof tests up to 50,000 P.S.I., continuity testing, hose installation, replacement, hose safety audits, employee training, and more – with all results available on an online database 24/7.

When you use OnGuard™ ID tags from Singer Equities family of companies, individual records are created that link to the online database that houses all certifications and hose safety standards built right in. ID tags are attached with a band that is digitally engraved with all relevant, unique information.

Cloud technology means there's no hardware to crash on your site. This provides you with real-time reporting. Run reports to notify you when a hose or belt is due for review and download the file to view in an Excel (CSV standards) spreadsheet. Utilize tracking services to analyze performance trends of your hydraulic and industrial hoses.

## SOLUTIONS FOR YOUR PIECE OF MIND

### MAINTAINING HOSE INTEGRITY

- Onsite Testing
- Onsite Hose Inspections
- Safety Audits
- Safety Seminars
- Customized Reports
- RFID Capability
- Serialized Hose Tagging
- Hose Kitting
- Vendor Managed Inventory

OnGuard™ Hose Management Services include cloud based hose tracking which we manage for you. OnGuard™ Asset Tracker is our proprietary cloud based asset management database. OnGuard™ Asset Tracker stores all of your hose information including type of hose, date of manufacture, test certs, serial number, location in your facility, inspection and re-testing alerts.
